

PRODUCT QUALITY POLICY

The Q-Connect® brand is positioned at a level which matches or exceeds the quality of the market leader.

Our aim is to supply sustainable products with an excellent quality at a competitive price.

The brand is sourced wisely from Europe and Asia to ensure that the pricing levels are competitive without compromising on quality, whilst minimising our carbon footprint.

We visit all our suppliers on a regular basis. They are also audited bi-annually by an independent body to ensure that their production processes and working practices are of an acceptable standard. Our suppliers all have modern and well-equipped factories and often produce for propriety brands as well.

Our products meet all European and UK health, safety and environmental standards. Our packaging is designed to meet international packaging standards.
